PROFILE

Junior QA Engineer with hands-on experience in test planning, test design, and defect management across web and mobile applications — complemented by 8+ years in telecommunications, bringing strong analytical, triage, and incident reporting skills directly applicable to QA. Logged 20+ defects in Jira while testing a pre-production P2P mobile app (React Native, Android). Applied Equivalence Partitioning, Boundary Value Analysis, and Decision Tables to identify edge cases; validated REST APIs using Postman and Browser DevTools. Completed ISTQB-based Manual QA course with 100/100. Currently advancing into automation with Java + Selenium; actively preparing for ISTQB Foundation Level certification. Open to Junior QA Engineer, QA Analyst, and Manual Tester roles — remote opportunities worldwide. Available CET/EU timezone.

WORK EXPERIENCE

02/2026 – Present
Remote

ODIN P2P Mobile App, QA Intern - Manual & API Testing

- Designed 37 structured test cases covering positive, negative, and edge case scenarios, alongside a 328-scenario checklist across 13 feature modules — ensuring comprehensive critical-path coverage for a pre-production P2P mobile application.
- Executed functional, regression, smoke, and exploratory testing across 2 build cycles per week — maintaining release stability throughout accelerated development iterations.
- Managed end-to-end defect lifecycle in Jira — from discovery and root cause documentation through fix verification — capturing Critical, High, and Medium severity issues with detailed reproduction steps to accelerate developer resolution.
- Validated REST API behavior using Postman — testing backend business logic across key user flows including promo code activation and order lifecycle confirmation, verifying JSON responses and HTTP status codes against expected outcomes.

2018 – Present
Remote

Magticom, Universal Hotline Operator

- Handle 60–70 inbound technical requests daily across mobile, ISP, and order management services — applying structured triage, issue documentation, and escalation protocols to L2/L3 support teams.
- Served as internal tester during CRM and call-handling system migration (2021) — conducted functional, performance, and load testing on live workflows, ensuring zero critical disruption to customer-facing operations.

EDUCATION & COURSES

- 03/2026 – Present **QA Automation Course — Java/Selenium/BDD Track, Quality Academy**
- Java fundamentals, Selenium WebDriver, Git, RestAssured, TestNG, Maven, BDD/Cucumber
- 02/2026 – 02/2026 **API Testing — Postman & REST APIs, Quality Academy**
Remote
- REST API testing: CRUD operations, JSON structure, Collections, Environments
 - JavaScript assertions using pm.expect(); automated test execution via Collection Runner
- 10/2025 – 01/2026 **Manual Software Testing — ISTQB-based, Quality Academy**
Remote
- STLC, SDLC, Agile/Scrum; test design: EP, BVA, Decision Tables
 - Bug lifecycle: Jira, Trello, ClickUp; test management: TestCaseLab, Qase.io
 - Final score: 100/100
- 2002 – 2006 **Bachelor's Degree - Humanities, Ivane Javakhishvili Tbilisi State University (TSU)**

SKILLS & TOOLS

Automation (in progress)

Java · Selenium WebDriver · TestNG · Maven · RestAssured · BDD/Cucumber · Git · IntelliJ IDEA

Test Management & Tracking

Jira · Linear · Qase.io

Testing & QA

Functional, Regression, Smoke, Exploratory Testing · Defect Lifecycle Management · API Testing

Soft Skills

Analytical thinking · Attention to detail · Structured communication · Team collaboration

Tools & Platforms

Postman (Collections, Assertions) · Swagger · DevTools · GitHub · GitLab · SQL (basic)

LANGUAGES

Georgian
